Ma'aden Mega Aluminium Project (USD 10.2 billion) - kicks off construction at Ras Al Zaur (KSA – Eastern Province)

Gulf Asia LLC has now broken ground on 19, Jan. 2011 on one very integral part of the overall USD \$ 10.2 billion Ma'aden / Alcoa Aluminium Project, at Ras Al Zaur, by starting work on the primary electrical building that houses the gas insulated switch gear (GIS) and also on numerous other buildings / substations around the project including 8 substations in the pot line rooms.

Gulf Asia LLC has mobilized a highly skilled

work force to Ras Al Zaur to execute this work which is scheduled to be completed at the end of next year.

Gulf Asia spokesperson and Vice President Mr. Richard Sirny attributes their successful bid and award of the contract due to it's long standing safety record and quality workmanship. Cost efficiency and competitiveness are certainly part of the equation but in today's market it is primarily the company with the best safety record and best quality

that will win the jobs. With over 25,000 m3 of concrete to pour and over 40,000 meters of duct bank to lay; Gulf Asia will certainly have a busy year ahead. Look for more updates on this very important contract.
